

# TRANSFORMING HEALTHCARE FOR PEOPLE WITH IDD

Our healthcare system does some things really well,  
but it can also be complicated and frustrating.

For 16 million people with intellectual and developmental  
disabilities (IDD), it can be ineffective and even unsafe.

By tapping the power of innovation,  
we can transform our system.

## STRENGTHEN THE THREE C'S

Smarter

**COVERAGE**

Stronger

**CONNECTIONS**

Better

**CARE**

Working together,  
we can drive sustainable change so that:

Insurers and payers  
"see" people with IDD  
and understand their needs

Providers feel prepared and  
confident helping patients get  
the supports they need

People with IDD get the  
care they need to thrive
